

Rename any folder with extension `.{645FF040-5081-101B-9F08-00AA002F954E}`

eg, if u've a folder games press F2, then type,  
"games.{645FF040-5081-101B-9F08-00AA002F954E}"

You will see automatically that the folder will appear as recycle bin :) double click on it .. OUPS !  
:) recycle bin ? :)

Then to get to original form, remove the extension using

"ren games.{645FF040-5081-101B-9F08-00AA002F954E} games" in command prompt.

Regards,

md5this Team
